

# Enhance your ITSM practices with Tempo

May 24, 2023

Tempo creates embedded solutions that **that enable organizations to track, plan, manage *and understand* time, their most constrained resource.**

# Resource & cost management

Make decisions informed by time data to optimize your plans and resources

## Timesheets

Stop losing time and start gaining insight with automated time tracking. Produce reliable data for reporting, invoicing and accounting.

## Planner

A lean but powerful solution built to centralize and fast-track the planning process and capture actionable insights into your workforce operations.

## Cost Tracker

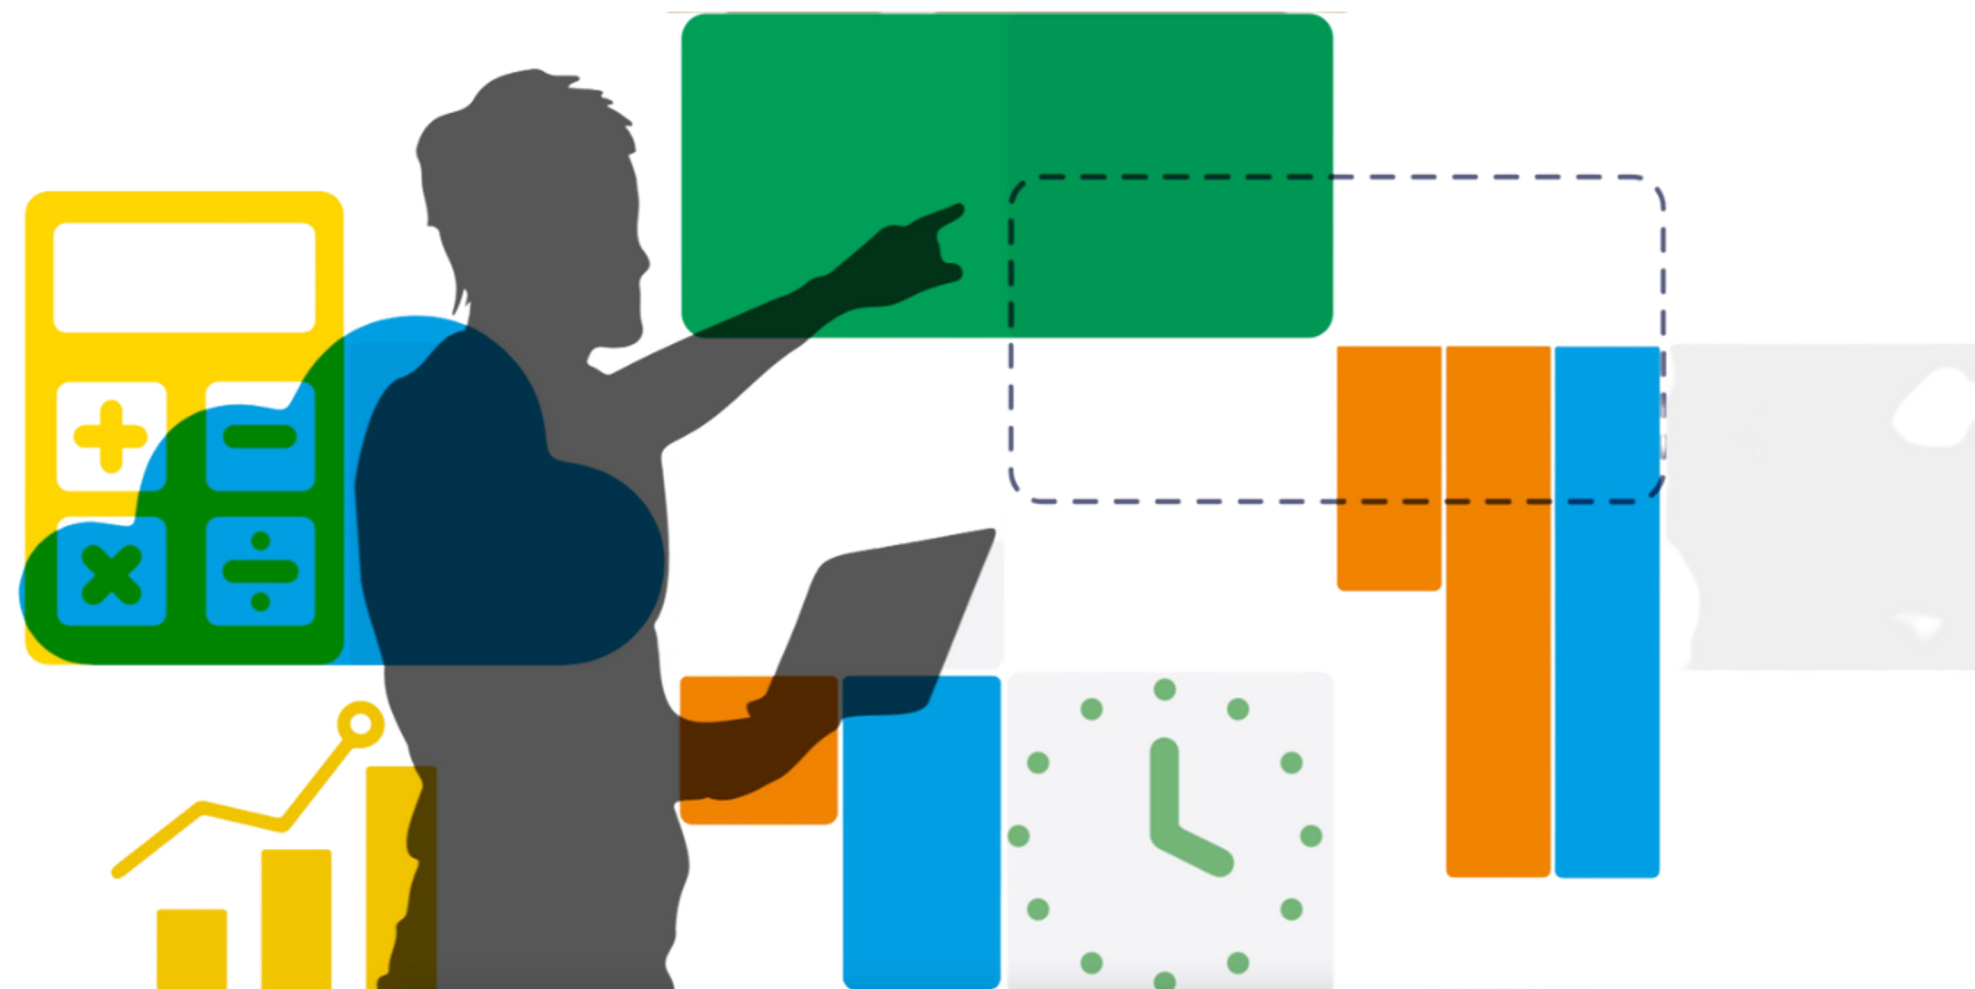

Translate Tempo Timesheets data to get true project costs (Cloud only)

## Budgets

An effective and agile budgeting tool to plan and monitor project financials in depth, including CAPEX & OPEX (DC/Server only)

# Project portfolio management

Give meaning to information scattered in Jira

Visualize multiple Jira projects, programs, and portfolios in one place, so you can align execution with strategy.

# Other solutions within the Tempo brand

## Roadmapping & idea management

Align on your strategy organization-wide with boardroom-ready roadmaps

NEWS: March 2023

## Adaptive & realistic planning

A project management solution that dynamically adapts to change and manages uncertainty

NEWS: April 2023

## Data visualization tools

Build beautiful — and accessible — charts to visualize your Atlassian data

# 1 in 3 of the Fortune 500 choose Tempo

29,000+ customers globally

79K+ app installs

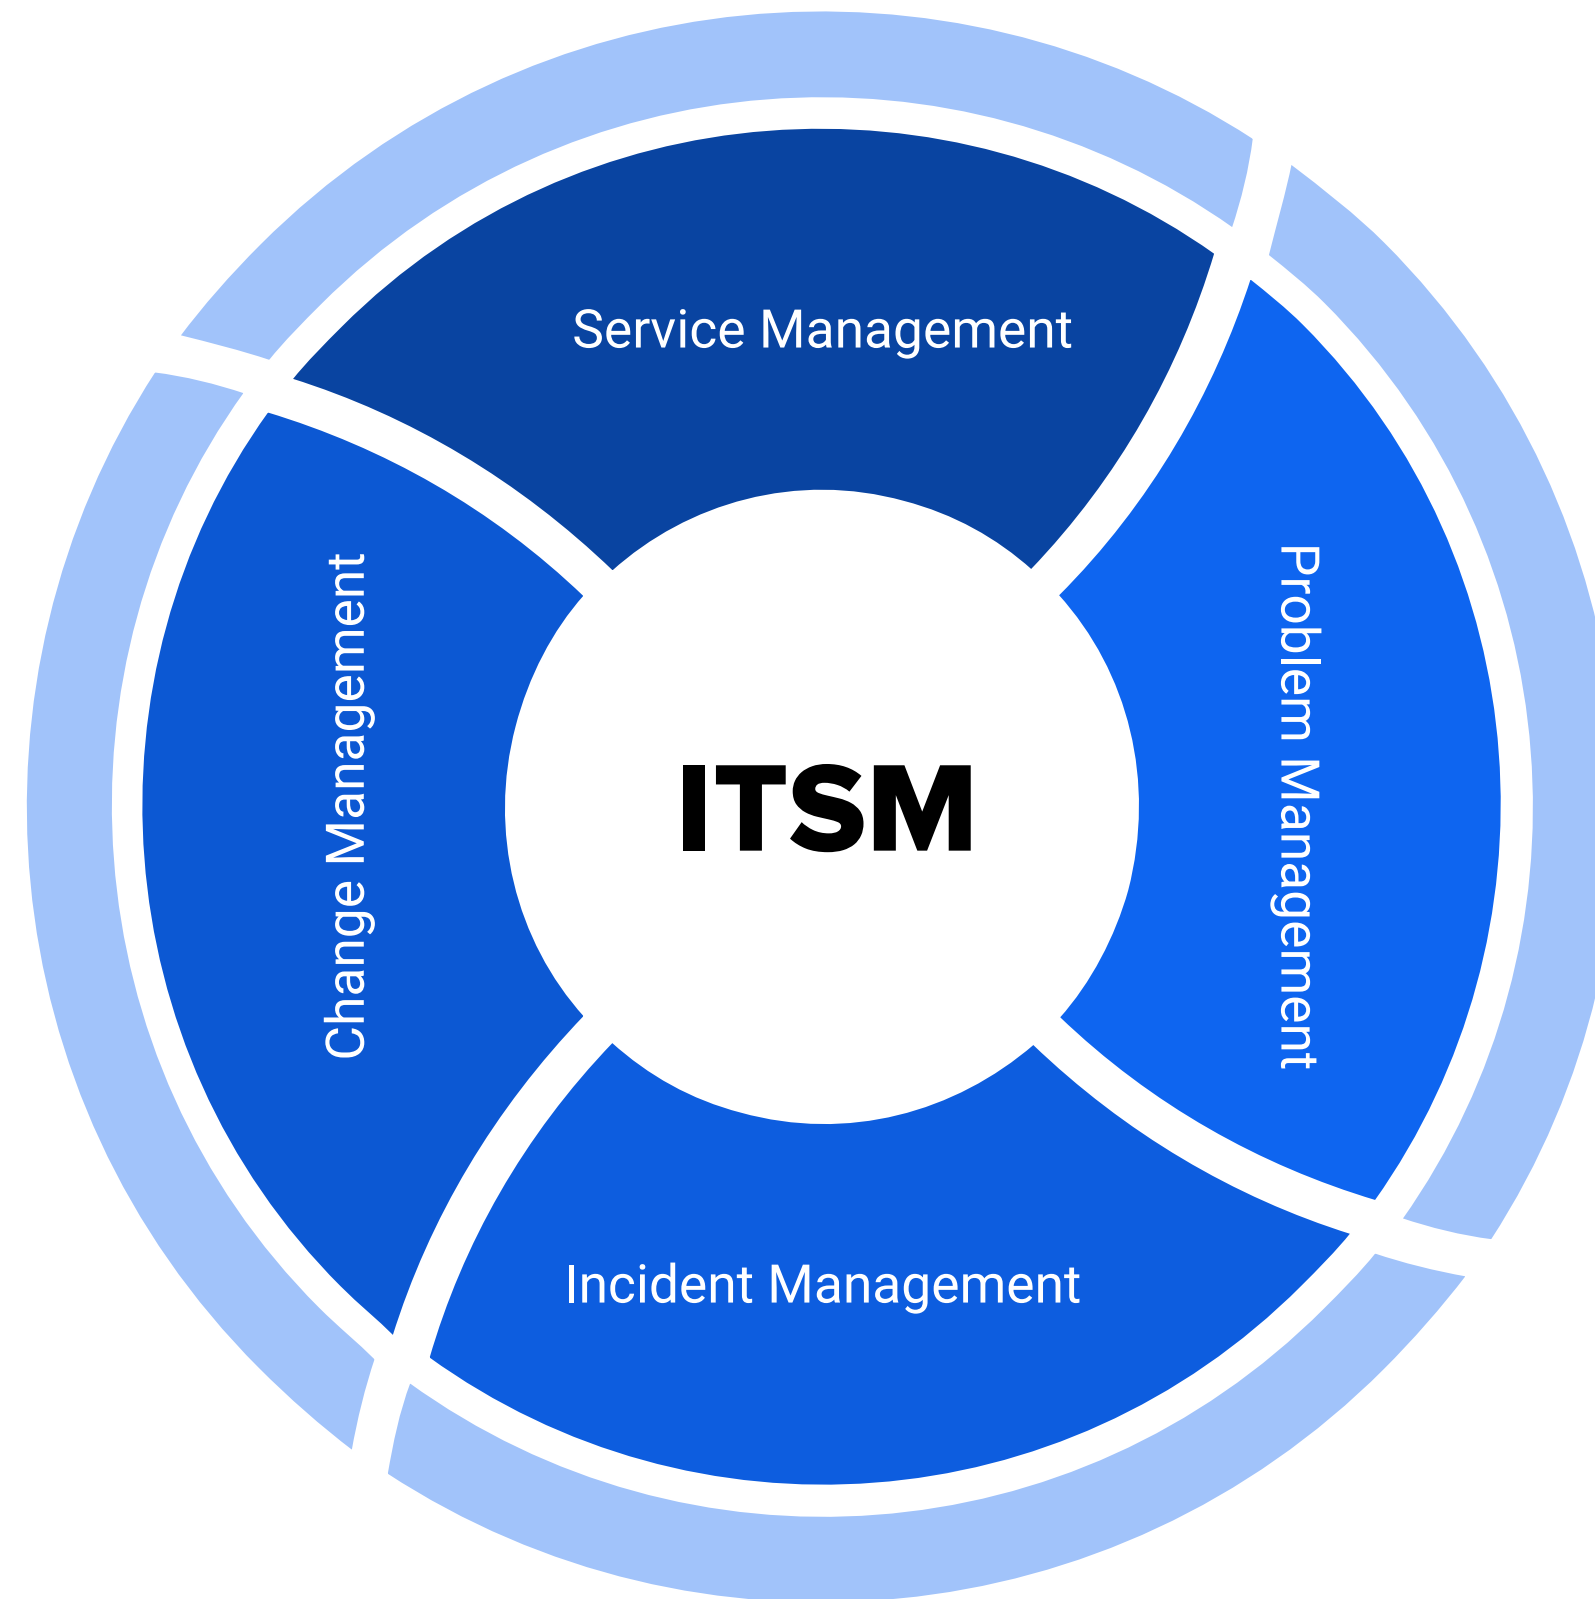

400M+ tracked time events

16M+ Jira issues structured

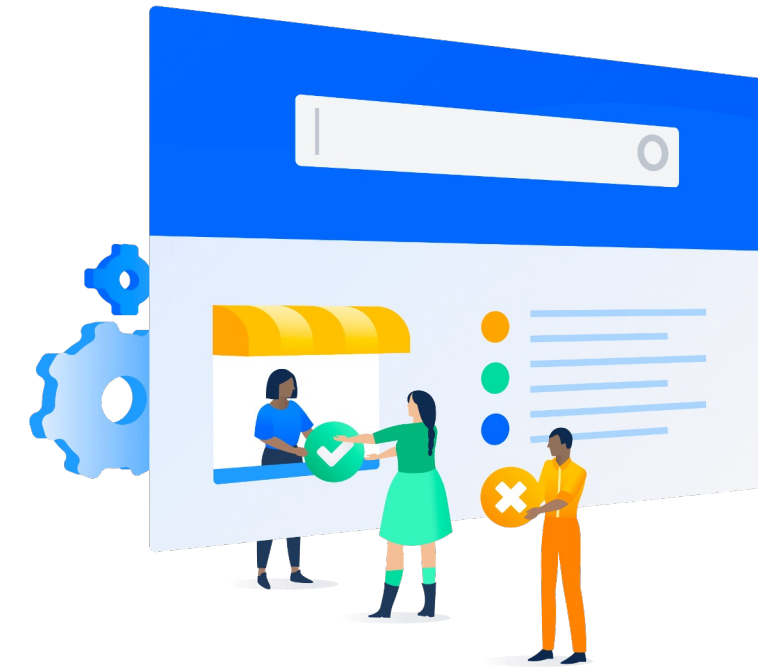

545 VAR solution partners

# ⚡ Jira Service Management

To truly see value from  
**Jira Service Management**,  
we need to expand its  
capabilities with other tools...

That's where  **Tempo** comes in.

IT Efficiency

Customer

Service & Support  
Team

Leadership

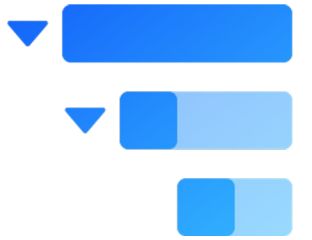

- Improves response time
- Increases satisfaction
- Prevents issues from escalating

- Increased efficiencies
- Establishes clear expectations
- Provides best possible service
- Streamlined processes

- Greater competitive advantage
- Insightful reports
- Visibility into use of resources
- Decreased churn
- Increase NRR/NPS

# Service Management Efficiencies

Track service level commitments (SLAs) with customers so we can discover areas needing improvement.

Structure for Jira will allow you to build reports and dashboards of aggregate information that you couldn't get from JSM alone.

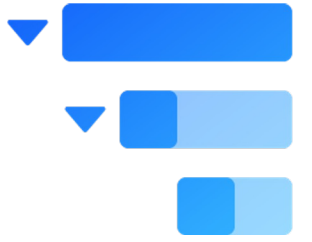

ITSM

Key	Summary	Urgency	Progress	Status	Severity
Group by Severity					
+ Insert issues: Project (Billy's Brewery, Peter					
Sev-1					
PETER-6	New equipment request	Low		OPEN	Sev-1
PETER-3	Leak in storage room	Low		OPEN	Sev-1
Sev-2					
PETER-4	Possible termite attack	High		WORK IN PROGRESS	Sev-2
BILLY-4	Weird insect found in beer storage room	Medium		IN PROGRESS	Sev-2
BILLY-3	Request termite check	Medium		OPEN	Sev-2
BILLY-1	Dead bugs keep appearing	Medium		OPEN	Sev-2
Sev-3					
PETER-5	Flies in storage room	High		COMPLETED	Sev-3
PETER-1	Infestation	High		OPEN	Sev-3
BILLY-7	Possible Mothra Sighting - Large moth s	High		OPEN	Sev-3
BILLY-6	Giant Praying Mantis Holding Kitchen Sta	Critical		OPEN	Sev-3

You can customize this to metrics or KPIs you have internally to track health and challenges.

# Time Management Efficiencies

Track average times to first response, as well as top and bottom quartile.

Timesheets by Tempo will allow you to have better insight into what your agents are spending their time on within tickets, allowing you to identify pain points and opportunities.

The screenshot displays the 'Log Time' modal in the Tempo application. The modal is overlaid on a ticket view for 'BILLY-2'. The ticket details include a description 'Spiders after slight flooding over the week...', a date of '16/Nov/22', and a user 'Kathryn'. The 'Log Time' modal contains fields for 'Date', 'Duration' (0h), 'Description', 'Account' (Please select), 'Billable hours' (0h), 'Remaining estimate' (0h), and 'User' (Kathryn). A 'Log Time' button is visible at the bottom right of the modal. The background shows a calendar view for 'Wed 16' with time slots from 08:00 to 14:00. A 'Log Time' button is also visible on the right side of the calendar view.

With time tracking as easy as hitting a button, data collected will allow teams to create reports to improve processes.
